

PLEASE do NOT change the rules so as to allow for cell phone use aboard airborne aircraft. Conditions in the cabin have deteriorated over the years, and allowing the use of cell phones would definitely contribute to making the average flight experience a miserable one. Imagine being stuck in some middle seat and having no way to escape one side of someone else's phone conversation! And just as the smoke didn't know how to stay in the smoking section in the old days, the sound wouldn't know how to stay in a designated cell phone area. The cabin is noisy enough as it is - please don't make it incredibly worse.
